

## The Neck of the Guitar

Important: You must know the letter names of the notes and their position on the neck for the three lowest strings (6th, 5th and 4th strings). The root or tonic bass note of the chords you will be playing are located on these strings therefore the positions of the chords will be evident when you learn and memorize the note positions on these lower strings. Fill in sharps and flats.

### THE NECK OF THE GUITAR

## Self Test #1 page 2

Click print and then fill out the Neck page up to the 12<sup>th</sup> fret and over to the 3<sup>rd</sup> string. Do this as often as you can until you have memorized this part of the test. Yet another self test but very important information that needs to be as accessible as English is to you when you speak. (Assuming, of course English is your first language. Oh well, I'm sure you get the point.)

### THE NECK OF THE GUITAR

Fill in all the notes.
